

# SATOSHI SQUARE

A product from **CRIPTOGRAFIA**

---

**Warm up your crypto meetup — before the first talk even starts.**

## THE PROBLEM WITH CRYPTO MEETUPS

People show up. They grab a drink. They stare at their phones waiting for the talks to begin. The real conversations — the ones that lead to partnerships, deals, and friendships — happen in the last 15 minutes, if at all.

## THE IDEA

Satoshi Square is a **live P2P trading board** that runs on the big screen while attendees walk in.

**No signup. No onboarding. Just connect your wallet — and the room comes alive.**

Someone lists an NFT. Someone else proposes a swap. A bid goes up for ETH. Suddenly strangers are walking up to each other, pointing at the screen, negotiating. The meetup hasn't officially started — but the energy is already there.

## HOW IT WORKS

- **Connect any wallet** — MetaMask, Coinbase, WalletConnect (EVM) or Unisat (Bitcoin + Ordinals)
- **Assets load instantly** — NFTs, Bitcoin Ordinals, and token balances — no manual entry
- **Live order book** — Any token pair: ETH/USDC, BTC/USD, MATIC/USDC, or custom pairs
- **NFT marketplace** — List your NFTs, receive swap proposals, negotiate IRL — all on screen
- **Zero fees, zero contracts** — Everything settles peer-to-peer in real life
- **One laptop, whole room** — Organizer runs Docker + ngrok — everyone joins via a shared link

## WHY IT WORKS

Crypto people already want to connect. They just need a shared focal point — something on the screen that gives them a reason to walk up to a stranger and say *"hey, I saw your listing."*

Satoshi Square is that focal point. It turns passive attendees into active participants before the first speaker takes the stage.

## TECH STACK

Next.js 14 · wagmi v2 · RainbowKit · Socket.IO · Bitcoin Ordinals (Hiro API) · Alchemy NFT API · Docker + ngrok

*Runs on any laptop. No cloud required. Fully open source.*

---

## BRING IT TO YOUR EVENT

Available to set up Satoshi Square at crypto meetups and conferences in Florianópolis and beyond.

**Reach out and let's make your next event one people actually remember.**

**CRIPTOGRAFIA**

## LIVE PLATFORM — SCREENSHOT

Both EVM and Bitcoin wallets connected simultaneously. NFTs and Ordinals loaded from wallet. Live order book. NFT market with active listings.

The screenshot displays the CRYPTOGRAFIA interface with the following sections:

- Top Bar:** CRYPTOGRAFIA logo, user address `B bc1pe7...zzkg`, and navigation icons.
- EVM WALLET:** Connected to `0x992a...7BFb`. Shows `0.0000 ETH` and a dropdown menu for `metaver50.eth`.
- BITCOIN WALLET:** Connected to `bc1pe73...zzkg x`. Shows the address `bc1pe737fxwrcu2t1fke92wxsqg4av9drp4xw620j0pkynjgg4lxu5s80zzkg` and a note: "Ordinals load automatically in the NFT panel below."
- ORDER BOOK · ETH/USDC:**
  - BIDS:**

Pair	Size	Price	Owner
ETH/USDC	1	2,000.00	0x992a...
ETH/USDC	1	2,000.00	0x992a...
  - ASKS:** No asks.
- PLACE ORDER:** Buy and Sell buttons.

- MY NFTS (80):** Filtered to Ordinals (30). Shows three diamond icons for Inscriptions #96242, #95158, and #95156, each with a "List" button.
- NFT MARKET:** 3 Live listings:
- 20GZ Pepe:** Pepe Editions by Matt Fur... Price: 10 USDT. Owner: 0x992a...7BFb. Buttons: Mark Sold, Remove.
- #169128 CryptoKitties:** Price: 1 ETH. Owner: 0x992a...7BFb. Buttons: Mark Sold, Remove.
- Inscription #95156:** Price: 100 USDC. Owner: 0x992ae...7BFb. Buttons: Mark Sold, Remove.
- MATCHED TRADES:** No matches yet.
